EDUCATION

University of Peloponnese

B.Sc. in Electrical & Computer Engineering

Patras, Greece

Sept. 2023 – Present

PROJECTS

IMDb Clone Desktop App | *Java, JavaFX, Maven, Jackson, BCrypt*

Jul 2025 – Sep 2025

- Architected a desktop app with **MVC** pattern – **FXML** views, service layer, repository abstraction, and in-memory storage for movies, series, and actors
- Implemented **BCrypt** authentication with session management, per-user ratings, multi-criteria search, and **CRUD** for all content types
- Parsed **TXT** data files into memory with **Java serialization** for user persistence and **10 custom exception** classes

Game Sentence Miner | *Python, Tesseract, EasyOCR, Flask, Tkinter*

Feb 2026 – Present

- Built a **Wayland** pipeline using **grim/slurp** for capture, **Tesseract** + **EasyOCR** with confidence scoring, Google Translate, and **Anki CSV** export
- Developed a **Flask+SQLite** sentence server, **Yomitan** WebSocket bridge, **Tkinter** overlay with hover mode, and per-game profiles
- Modular architecture across **20+** modules with duplicate detection, capture zones, dictionary lookups, and **147 unit tests**

Translate Mania | *React, TypeScript, Vite, Tailwind*

May 2026 – Present

- Built a language-learning game with **React** and **TypeScript** – translation quizzes, blog with **KaTeX** math, and project showcase
- Implemented dark-theme **Tailwind CSS** UI, **Anki** deck downloads, language resources, and **RSS** feed generation
- Automated **GitHub Pages** deployment via **CI/CD** with **Gemini** recommendation integration

CLI Student Database System | *C, POSIX Threads, Make, REST*

Jan 2026 – Feb 2026

- Developed a **CLI** system with **4 background threads** – auto-save, backup rotation, stats monitoring, and a **REST API** server
- Implemented department-based **RBAC** with role authentication, audit logging, input sanitization, and **CSV** import/export
- Binary file storage with backup rotation, regex search, and thread-safe **mutex** operations across all services

CLI Task Manager | *C, POSIX Threads, Make*

Nov 2025 – Dec 2025

- Built a CLI to-do app with multithreaded background saves, task dependency graphs, priorities, due dates, tags, and full-text search
- Dynamic memory via **malloc/realloc**, **pthread_mutex_t** thread safety, and pipe-delimited file persistence
- Colorized terminal output, task notes, sorting by name/priority/date, and tag-based filtering

CLI ATM System | *C, Make, File I/O*

May 2025 – Jun 2025

- Developed a **CLI ATM** with **PIN** authentication, multi-account management, admin mode, and file-based persistence
- Modular design across separate compilation units for customer, account, system, UI, and transactions
- **Makefile** build system with balance inquiries, deposits, withdrawals, PIN changes, and account workflows

SKILLS

Languages: C, Java, Python, SQL (MySQL), JavaScript/TypeScript, HTML/CSS, MATLAB/Octave, LaTeX, Bash

Frameworks: JavaFX, React, Node.js, Flask, JUnit, Tailwind CSS

Embedded & HW: ESP32 Microcontrollers, Tesseract OCR, Digital Logic, ROS2

Tools: Git, Docker, GNU Make, Maven, VS Code, IntelliJ, Linux (Arch), LTspice, Multisim

Spoken: Greek (Native), English (C2), German (B2), Chinese (Beginner)
